

CANCER SURVIVOR?

Have you had your omentum removed during cancer surgery?

Help us study life **without an omentum**.

The Omentum Project is seeking **55 women** who have had their omentum removed during cancer surgery to participate in an **IRB-approved research study**, "Processing Salty Food with/without an Omentum."

DO YOU QUALIFY?

- Female, ages 18-74
- Have not experienced Stage 3 or Stage 4 cancer
- No kidney disease or high blood pressure
- Not currently pregnant

WHAT PARTICIPATION INVOLVES

- Complete a one-time, at-home study (approx. 3 hours)
- Eat a specific salty food
- Record symptoms before and after eating

SPECIAL INITIATIVE

For each completed study before September 30, 2026, The Omentum Project will donate \$25 to one of the three participating nonprofit organizations:

OFFICIAL STUDY INFORMATION

Study Goal:

To determine if there is a difference in symptoms after consuming a salty food for women with an omentum and women without an omentum

Please note: there is no compensation for participation

Contact Information:

For general questions, contact **Meg Wilkinson** at: TheOmentumProject@gmail.com

IRB Statement:

This is an **Institutional Review Board (IRB) approved research study**. For questions related to the IRB review and rights of participants, contact **Emily Spinner**, IRB administrator, Ellis Hospital, Schenectady, NY: harte@ellismedicine.org

The Nancy B. Clemente Cancer Fund is the Project Promoter for this important study.
